## Address Note Codes & Descriptions

*\*New notes may be added over time, and some descriptions may change, but the codes will never change*

Notes	NotesDesc	Description
1	BadAddress	All indications suggest this is a bad address.
2	AddressNotFound	The address was not found by USPS.
5	HouseNumberOutOfRange	The given house number does not seem to be a valid one.
100	AddressFoundByUSPS	The Address was found in the normal USPS dataset.
101	AddressFoundInSupplementalData	The Address was not found in the normal USPS dataset but was found in supplemental data that aggregates many different sources. While not as authoritative as USPS data, this flag still indicates a high likelihood that the address is valid.
102	AddressIsGeneralDelivery	Address may not have been found in USPS or other datasets but has a high likelihood of being good and is likely in a General Delivery area.
120	IsBusiness	Address appears to be a business.
121	IsResidence	Address appears to be a residence.
122	IsPOBox	Address appears to be a PO Box.
123	IsCMRA	Address appears to be associated with a commercial mail handling facility.
124	IsStreetAddress	Address appears to be a standalone dwelling residence or business.
125	IsHighRise	Address appears to be a multilevel apartment or business building.
126	IsMilitary	Address appears to be in a known military area.
130	IsUniqueZip	Zip code belongs to a known area such as university where mail and packages are delivered to a central location and distributed from there. The actual street address is irrelevant as long as it contains a house number and street name.
131	IsVacant	Address appears to be vacant.
132	IsReturningMail	Address appears to be returning mail at the moment.

## Geocode Note Codes & Descriptions

*\*New notes may be added over time, and some descriptions may change, but the codes will never change*

Notes	NotesDesc	Description
10	LocationNotFound	No Latitude and Longitude was found for the given location.
110	IsLocationMatch	Latitude and Longitude found should represent the property in question.
111	IsZip4Match	Latitude and Longitude found should represent the centroid of all locations matching the first 9 digits of the zip code.
112	IsZip3Match	Latitude and Longitude found should represent the centroid of all locations matching the first 8 digits of the zip code.
113	IsZip2Match	Latitude and Longitude found should represent the centroid of all locations matching the first 7 digits of the zip code.
114	IsZip1Match	Latitude and Longitude found should represent the centroid of all locations matching the first 6 digits of the zip code.
115	IsZipMatch	Latitude and Longitude found should represent the centroid of all locations matching the first 5 digits of the zip code.
116	IsCityMatch	Latitude and Longitude found should represent the centroid of the given city and state.
140	IsUnincorporated	The location was not found in a known city boundary. It may be a census designated place or not assigned to any known "place"
