Note Codes

The NoteCode table contains a list of current and upcoming note flags that the service can report on when processing a request.

Notice: New NoteCodes and NoteDescription values may be added to the service at any time.

NoteCode	NoteDescription	Summary
1	IsUnknownProvider	<i>IsUnknownProvider</i> indicates provider information was unavailable for the provided phone number.
2	IsInvalidNumber	<i>IsInvalidNumber</i> indicates that the provided number is invalid.
3	IsPorted	<i>IsPorted</i> indicates the provided phone number has been ported to a new or existing carrier. This is common among wireless subscribers, and users who wish to retain their phone number when switching phone device (e.g. Landline to Wireless).
4	IsLandline	<i>IsLandline</i> indicates the provided phone number is registered as a Landline.
5	IsWireless	<i>IsWireless</i> indicates the phone number is assigned to a wireless device.
6	IsVOIP	<i>IsVOIP</i> indicates the phone number is assigned to a VOIP provider.
7	IsUnknownLineType	<i>IsUnknownLineType</i> indicates the line type could not be determined from the carrier.
8	IsTollFreeNumber	<i>IsTollFreeNumber</i> indicates the provided number is a Toll Free Access number.
9	IsGoogleVoiceNumber	<i>IsGoogleVoiceNumber</i> indicates the provided number is a registered Google Voice number. There is increased risk for fraud with Google Voice numbers from operators overseas.
10	IsSkypeNumber	<i>IsSkypeNumber</i> indicates the provided number is a registered Skype number. There is increased risk for fraud with Skype numbers from operators overseas.
11	IsPortableVOIP	<i>IsPortableVOIP</i> indicates the registered phone carrier provides local phone number registration without physical address. There is increased risk of fraud with portable voip numbers from operators overseas.

12	IsPossiblePortableVOIP	<i>IsPossiblePortableVOIP</i> indicates the registered phone number is likely assigned to a carrier which provides local phone number registration without physical address. There is increased risk of fraud with portable voip numbers from operators overseas.
13	IsPrepayPhone	<i>IsPrepayPhone</i> indicates the phone number is assigned to a phone carrier offering prepay services. There is increased risk of fraud with phone numbers identified as prepay.
14	IsIncompleteNumber	<i>IsIncompleteNumber</i> indicates that even though a phone provider match was found for the first 6 digits, the number is incomplete and ultimately an invalid phone number.
15	IsGarbage	<i>IsGarbage</i> indicates that there is a pattern in the phone number that we have determined to classify the phone number as garbage.
16	IsPossibleGarbage	<i>IsPossibleGarbage</i> indicates that there is a pattern in the phone number that we have determined to classify the phone number as possible garbage.
