

Support for Legacy Services

This section contains information on our Legacy Services. Our Legacy Services are no longer supported which means we do not actively perform updates to the services listed. We will continue to support clients who are integrated with these services for the duration of their contract. We do however ask our clients to switch to our updated services which are fundamentally faster, more robust, and more secure. For more information, please contact us at support@serviceobject.com ([mailto:\\support@serviceobjects.com](mailto:support@serviceobjects.com)).
